

CHARLOTTE GLOBE

DESIGN BY **DORIANA AND MASSIMILIANO FUKSAS**

January 2019

The new Charlotte Globe suspension recreates the laborious patterns and impalpable elements of honeycomb, enclosed in a welcoming sphere.

Charlotte globe is crafted of Cristalflex®, with an internal structure in Lentiflex® that diffuses the light, and is equipped with our unique magnetic system. The sphere has the same profound, concentric geometry that defines the rest of Dorigana and Massimiliano Fuksas' collection.

A combined electrical and hanging wire adds to the lamp's ethereal personality, and 4 light sources change in intensity and temperature depending on purchased bulbs. Charlotte Globe's 60 cm diameter adds delicate opulence to interiors.

The collection also includes a floor lamp, applique, and two other suspension sizes.

■ SUSPENSION - Ø60 cm x h.50 cm (Ø23 -1/2" x h. 19")
4X10W LED Filament E27 or E26
